

NEDO SKOBALJ

FULL-STACK SOFTWARE ENGINEER

+46763115095
nedo@nedo.se
Rådjursstigen 34 Lgh 1301
170 76 Solna
Sweden

Solution-oriented developer with experience in frontend development (Angular) and backend development (Java, Spring Boot). Skilled at delivering high quality applications and enjoys working in agile, cross-functional teams. Experienced in working with microservices and Clean Architecture.

WORK

EXPERIENCE TECH LEAD

Swedbank, Stockholm

May 2023 - Today

- Leading role among developers and technically responsible for team's applications.
- Planned migration of team's applications from legacy monolith to a microservices architecture.
- Presented technical solutions and designs to software architects.
- Designed and developed REST APIs in Spring Boot 3 with Java 17/21.
- Developed frontend flows with Angular.

SOFTWARE ENGINEER

Swedbank, Stockholm

April 2019 - May 2023

- Team developed flows for authorization administration used by both corporate customers and bank advisors.
- Leading role in frontend development. Developed several flows and guided/mentored other developers.
- Set up plan for migration of the team's applications from AngularJS to Angular.
- Developed multiple backend services in legacy (Java 8) monolith and in microservices.
- Administration and incident management of services in production.

SUMMER DEVELOPER

Ericsson, Stockholm

Summer 2017

- Developed, together with other summer interns, a tool that acted as an interface between different tools used by the product development department.
- Added to the existing code base and wrote new code in Java and Python.
- Contributed to the entire product development process, from design to testing.

SUMMER DEVELOPER

Ericsson, Stockholm

Summer 2016

- Developed, together with other summer interns, an application using React and Electron used to visually view and edit test cases.
- Contributed to the entire product development process, from design to testing.
- Worked according to Scrum which we then presented learnings from to other teams.

SKILLS

- Several years of professional experience with Java 17/21.
- Good knowledge of Spring Boot, mainly Spring Boot 3.
- Good knowledge of Angular and TypeScript.
- Relational databases. Experience with Oracle Database and MS SQL Server.
- Good knowledge of Clean Architecture and Domain-Driven Design.
- Experience developing and owning microservices.
- Designing, implementing and consuming REST APIs.
- Git
- CI/CD
